DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-12, 18, 20-29, 37, 38, 41, 42 and 44-48 are allowed.

2. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicant's amendments filed August 9th, 2010, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. The prior art does not teach all of the limitations of the independent claims in combination with the other elements presented.

The prior art of record teaches in response to a first Authentication, Authorization, and Accounting server receiving a request to authorize a client, said first server obtaining an accounting record for the client and authorizing said client based on said account record (Jones, see pg. 5, lines 10-25 overview where an AAA server receives a request to authorize a client and obtains a record; see also fig. 2 process). The prior art further teaches a RADIUS access accept message that includes the account record within the access accept message (Jones, see pg. 10, lines 23-35 where the record is logged and then sent to a second AAA server as part of a RADIUS start session message; see also fig. 5B; pg. 7, lines 10-15). The prior art further teaches a wireless service gateway using an AAA server that implements the

Art Unit: 2441

lightweight directory access protocol (Wang, paragraphs 0109-0115, 0186-0187, and fig. 2 structure).

However, as per amended claims 1, 3-12, 18, 20-29, 37, 38, 41, 42 and 44-48, the prior art fails to teach a first AAA server obtaining a record for the client from an external resource after a request to authorize access to a network resource, authorizing the client based on an accounting record, wherein a RADIUS access accept message is sent including the accounting record to a second network device causing the second network device to log the accounting record and send the accounting record to a second AAA server within a RADIUS start session message. These limitations distinguish the claimed invention from the prior art of record when taken in the environment of the full claim language.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nicholas Taylor whose telephone number is (571) 272-3889. The examiner can normally be reached on Monday-Friday, 8:30am to 5:00pm.
